Group No: 05

Topic: Whatsapp Birthday Bot

Objective:

The objective of the WhatsApp Birthday Bot project is to automate the process of sending personalized birthday wishes to contacts on WhatsApp by retrieving birthdays from a database and using WhatsApp's API to send messages on the correct date. The outcome will be a fully functional and scalable bot that efficiently sends personalized messages, ensuring error-free execution and providing the potential for future enhancements such as media sharing or multi-language support.

Outcome:

The outcome of the WhatsApp Birthday Bot project will be a reliable and automated system that sends timely, personalized birthday wishes to contacts on WhatsApp. It will be a scalable solution that efficiently manages and schedules messages, with the potential for future improvements such as supporting media attachments and integrating with other services for enhanced functionality.
